The restriction requirement dated October 7, 2008 has been rescinded in view of applicant's persuasive arguments dated November 6, 2008.

Information Disclosure Statement

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 6,585,206 to Metz et al. The present invention reads on Metz as follows: Metz teaches an equipment support comprising an equipment supporting portion (16, 196) and at least one member (36, 23). The equipment supporting portion is configured to support patient care equipment. The at least one member is rotatably coupled to the

equipment supporting portion. See figure 3. The equipment supporting portion includes an upper member (210), a lower member (196) and a pair of vertical posts (16) extending between the upper and lower members. The at least one member is pivotally coupled to one of the posts adjacent to the upper member. The at least one member comprises an arm pivotally coupled to the equipment supporting portion, and the arm is configured to support at least one IV container.

Allowable Subject Matter

Claims 4-27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sims 4,945,592 teaches a patient care apparatus.
